Make your modern lifestyle an easier lifestyle

Our philosophy is clear : Designed for the real world. At Hotpoint we believe passionately that it is our job to make your lifestyle easier. We recognise that the kitchen is the heart of the home and influences the smooth running of your life. We also know that in the real world none of us has enough time to run our homes as perfectly as we would like. So we have put a lot of thought into every detail and spent a great deal of time listening to you and taking the way you live into consideration.

Relevant Features

By listening to you, we can develop features that you really want and guarantee that they deliver positive, real-life benefits. Our designers work hard to ensure that product innovations are easy to use, genuinely helpful, and make use of new intelligent technologies which allow you to be in control.

Great Performance

We know you expect high quality performance you can depend on. Our appliances are designed to the highest standards in the industry. Whether it is energy efficiency, speed, silence, size, innovative technology or choice of programmes, you can be certain that we've thought of it. Because great performance makes your life easier, helping you to manage your time and keep pace with modern life.

Stylish Designs

We know that looks are very important to you. Hotpoint appliances are modern and stylish and designed to look good in your home. But good design also means ensuring they are a real pleasure to use. Our designers take time to consider every last detail, so that they can make a door, a handle or a shelf easier to use.

Real Reliability

We know how much you depend on your appliances and as the UK's best selling appliance brand, we have earned your trust across many years by delivering products that work over and over again.

Superior After Sales Care

Once you've bought your appliances, we don't stop there. Our After Sales Care is second to none so you can be sure that we will be there to support you quickly and effectively.

Ultima

As the name implies, these models are the ultimate in washing machines. Sleek, stylish and packed with innovation, the Ultima is the premier choice for those who demand style with substance. Sophisticated features like Super Silent and the state-of-the-art LCD display are designed to lighten the load. Also these high performing dream machines deliver the best 'AAA' wash, energy and spin performance.

Aquarius+

Stay in control with Aquarius+ machines. At the touch of a button the user-friendly LED interface allows you to adjust the temperature and spin speed of your wash whilst showing you the 'Time to End' and Time Delay countdown. Together with all Aquarius wash features Aquarius+ models are Super Silent too.

Aquarius

Aquarius models are designed for the real world with a host of features including Super Wash, Woolmark Gold Care and Fast Wash cycles to keep you in step with the pace of modern life. Delivering 'A' wash and energy performance, Aquarius products have become a firmly established favourite, combining stylish looks with high performance and great value.

First Edition

Equipped with all the essential wash programmes, First Edition is a practical addition to your life and your kitchen, offering incredible value for money without compromising on performance. With easy to use programmes, a 5.5kg load capacity plus a range of features including Auto Half Load and Energy Save, First Edition continues to save you time and money by delivering 'A' wash and energy performance.

Colour and Style

As your home reflects your individuality, Hotpoint appliances come in a range of colours and styles to fit your life as well as your kitchen. Four fashionable finishes, which look great but are hardwearing enough to cope with the real world, are available across our product range.

Satin Aluminium

The ultimate in sophistication, this metallic finish is as practical as it is beautiful. Scratch and fingerprint resistant, it is an ideal alternative to stainless steel, providing a stunning contrast to warm woods and light finishes coming into its own when used with hi-tech or retro themes.

Polar White

If you change your decorating style as often as your socks, then Polar White is the obvious choice. Without compromising on style, this cool white gives you all the flexibility in the world and fits in with every scheme - from a country kitchen to a loft apartment.

Sandstone

If your kitchen is the heart of your home, this is the ideal choice to create a cosy and welcoming atmosphere. Understated and subtle, its warm cream tone complements the natural textures of traditional kitchens or blends equally well with new soft modern colours.

Graphite

This is cutting edge style for the contemporary kitchen, a versatile finish that boldly sets the tone. In a busy family kitchen or a minimalist bachelor pad, this serious design has a sleek metallic finish underlined by contrasting trims.

Lighten the
load with
features that
make your
life easier

Super Silent

A Hotpoint Super Silent washing machine gets on with the job so quietly you'll hardly know it's working, day or night. Its specialised induction motor dramatically reduces noise levels during the wash and spin cycles to as low as 47dB. Now that's what we call sound engineering.

Woolmark Gold Care

The Hand Wash Wool Programme is endorsed by Woolmark to care for your favourite wool garment. Extra gentle agitation and low-spin speeds ensure that your most cherished items get the same personal touch as a hand wash.

In the UK and Eire the Woolmark is a Certification Trade Mark.

Super Wash

This super option tackles even the worst-case scenario in just one wash. Delivering a performance that's superior even to 'A' class and with no need for a pre-wash, this feature more than lives up to its name.

A+ Energy

The ultimate in efficiency, 'A+' outshines even an 'A' rating. Kinder to the environment and your pocket, our 'A+' energy rated products use less electricity while continuing to deliver top performance.

Wash

A^{40°}

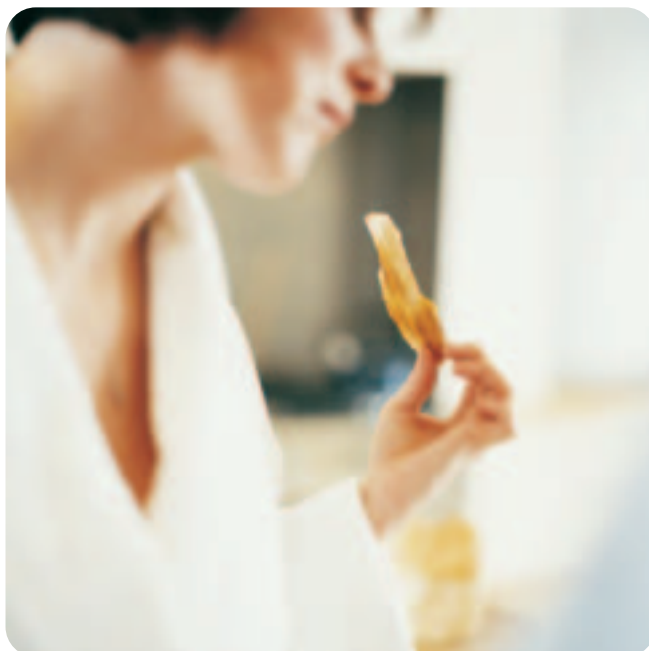

'A' Wash at 40°

40°C is the most commonly used wash temperature and Hotpoint makes sure you get the very best out of it with outstanding 'A' wash performance.

Fast Wash Programmes

Keeping up with the pace of modern life, Hotpoint have two fast wash programmes. A 30-minute, 30°C cycle for lightly soiled small items and a 60-minute, 60°C programme for bigger cotton loads. So you're always up to speed with clean washing in extra quick time.

Time Delay

You can't turn back time - but you can delay it, by up to 24 hours. Do the washing whenever it suits you - while you're at work, out to dinner or even after you've gone to bed.

Time Saver

You've come in late from work, the dog needs a walk and the phone's ringing. There never seems to be enough hours in the day - but we can help you gain a few with this feature that cuts wash times by up to a third on selected programmes.

Mini Load

This option really comes into its own when you only need a couple of items washing. The Mini Load will quickly wash just a few items without wasting time, energy or water.

Variable Temperature and Spin

Modern life demands flexibility so we've built that in too! You can vary temperature and spin levels at the touch of a button to customise wash programmes to meet the demands of different fabrics, leaving them thoroughly clean and in top condition.

How dirty?

Set by How Dirty

Create the perfect programme for your wash. Whether you're putting the team kit through its paces or freshening up your work shirt, simply select from light, normal or heavy soil options to tailor the agitation level and length of the cycle to give you the best results.

Reduce Creases

Because we know that ironing is one of your least favourite chores, Hotpoint have smoothed some of the wrinkles out for you. The Reduce Creases option reduces both the wash agitation and spin speed so washing comes out with fewer creases to ease your pressing problems.

Child Lock

Peace of mind at the touch of a button, the Child Lock is invaluable for keeping busy little fingers out of trouble! Once activated it prevents even the most inventive and inquisitive from making any changes to the wash programme you have set.

Wash, spin
energy

AAA

AAA Performance

'AAA' rated washing machines have the best wash, energy and spin performance. These models get your wash cleaner using less electricity and with less water remaining after every spin, cutting drying times too.

Ultima Washing Machines

A Cut Above

Ultima washing machines have the best 'AAA' wash, energy and spin performance and innovative features like Super Silent and Set by How Dirty. The LCD display tells you everything you need to know at a glance – the fabric type, spin speed, temperature, programme progress, time delay and time left to run.

Washer Dryers

Have It All

Hotpoint Washer dryers combine all our washing and drying expertise to give you the best results. Including Hotpoint's Washing Machine features such as Woolmark Gold Care, Super Wash and 6kg Wash Load, they also have valuable drying features such as Set and Forget Sensor Drying.

Wash and dry load
5+5kg

5+5kg Wash and Dry Load

No need to hang about waiting for the wash to finish. These resourceful washer dryers take care of everything, washing and drying a 5kg load in a single uninterrupted cycle.

Set and forget **Set and forget**

Set and Forget Drying

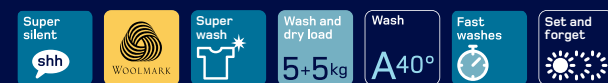

We take the guesswork out of drying times with a sensor that monitors moisture and temperature levels. When it detects that a load is dry, the programme automatically moves to a final 10-minute cool tumble. And our top end models even have Multi Level Set and Forget Drying where you can choose your level of drying - iron dry, hanger dry or cupboard dry - so nothing is wasted, least of all your time.

Tumble Dryers

More Than Just Hot Air

Hotpoint's Condenser and Vented Tumble Dryers do more than just get your clothes dry. With features like Set and Forget Drying and Time Delay they dry your laundry to the level you want, when you want. Packed full of programmes, there's sure to be one to suit your needs.

Time Delay

Put it off until later without feeling guilty. Delay the start time by up to 18 hours to fit the drying in with your schedule, or to take advantage of electricity when it's at its cheapest. And with the Creasecare option you won't have to worry about heavy creasing.

Load size

6kg

Load size

7kg

Big Loads

Looks can be deceptive. Our dryers may come in standard sizes but they take huge loads. In our Vented Dryers you can transfer a complete 6kg load straight from the washing machine and get it dry in a big way. Hotpoint Condenser Dryers go one further with a massive 7kg load.

Set and forget

Set and forget

Set and Forget Drying

We take the guesswork out of drying times with a sensor that monitors moisture and temperature levels. When it detects that a load is dry, the programme automatically moves to a final 10-minute cool tumble. And our top end models even have Multi Level Set and Forget Drying where you can choose your level of drying - iron dry, hanger dry or cupboard dry - so nothing is wasted, least of all your time.

Wool dry

Wool Programme

No need to be timid about machine drying delicate woollens, this extra gentle programme has been specifically designed to take special care of your finest wool items, leaving them dry and in perfect condition.

Crease-care

Creasecare - Pre and Post Drying

A smooth operator, this programme takes care of clothes that are dried or waiting to be dried on a time delay. By intermittently tumbling them without heat, the load never settles long enough for heavy creases to form.

Condenser Dryers

An ultimate drying convenience, condenser dryers don't need a vent hose so they can be placed anywhere in your house. The internal condensing system collects moisture into an easy empty water bottle at the top of the machine so you don't have to get down on 'all fours' every time it needs emptying.

Display
LCD

Display

The LCD interface is a new and easy way to programme your condenser dryer. You can select the programme and the display tells you everything you need to know including programme progress, 'Time Delay', heat settings, fabric type and 'Time to End'.

Flush Controls
'A' Wash, 'B' Energy and 'B' Spin Performance

Dimensions: H 820 x W 595 x D 537 (mm)
Colour: White

Jargon Buster

To make sure you get exactly what you want, here are all Hotpoint Laundry Features explained in plain English:

5+5kg Wash and Dry Load: 5kg load can be washed and dried in one uninterrupted cycle

30 Minute Fast Wash: A 30 minute, 30°C, 3kg fast wash

60 Minute Fast Wash: A 60 minute, 60°, 5kg cotton fast wash

'A' Wash @ 40°C: A 40°C Cotton Wash programme delivering 'A' Wash performance

'AAA' Performance: 'AAA' Performance washers have the best 'A' rated wash, energy and spin performance. These machines are also Energy Efficiency Recommended

Airing Programme: 20 minute cool tumble to refresh the load

Auto Creasecare: Prevents excess creasing on any wash programme by gradually reducing the water temperature towards the end of the cycle

Auto Half Load: Hotpoint's washing machines automatically adjust the water level for any size load to help save time and money when washing smaller loads

Child Lock: Prevents little fingers from altering any options or programmes you have chosen

Creasecare - Pre and Post Drying: The machine periodically tumbles the load before and after drying to prevent heavy creasing

Delicates Programme (Dryers): A low heat programme tailor made for delicate items

Easy Iron: 10 minute programme to relax fibres for easier ironing

Energy Rating: Energy is measured on a scale from 'A' to 'G' with 'A' being the most energy efficient

Energy Save: Reduces the temperature of any programme by 5°C to 10°C to save energy

Extra Rinse: A full 14 litre extra rinse for large wash loads, items for young children or those with sensitive skin

Final Cool Tumble: 10 minute Cool Tumble at the end of the programme which lowers the temperature of the clothes to a suitable level for handling

Hand Wash: A gentle 30°C, low agitation programme to machine wash 'Hand Wash Only' items

High and Low Heat Settings: A high or low heat setting can be selected on the dryer to suit the load to be dried e.g. Cottons high heat & Acrylics low heat

LCD: Large interface screen gives feedback on the wash or drying programme, what stage it is at, the time left to run, selected programme modifiers and the Time Delay countdown

LED: Displays 'Time to End' and Time Delay countdown

Maximum Detergent Usage: The extra large detergent dispenser with its unique spray system is easy to fill and makes sure the maximum amount of detergent is delivered to the wash

Mini Load Programme: Washes a small load using less water and energy

Out of Balance Protection: Hotpoint's Electronic Out of Balance Protection System ensures the machine does not spin when the load is unbalanced. The machine will try to distribute the load evenly around the drum to minimise vibration and prolong the life of the machine

Programme Progress Indicators: Show where the machine is in the wash or drying cycle, for example: door locked, prewash, wash, rinse & spin

Reduce Creases: The Reduce Creases option lowers the spin speed to 800rpm so washing comes out with fewer creases

Rinse Hold: Clothes are held in the final rinse water, keeping them fresh until you are ready to complete the programme

Safety Start Button: The dryer will not work unless the start button is pressed, irrespective of whether the door is closed or a programme or time selection has been made

Self Diagnostics LED's: A Self-Diagnostics system tells you, via LED indicators, if you haven't closed the door properly, the load is out of balance or if there is a problem with the water supply

Set and Forget Drying (Single Level): The machine senses when the load is dry and automatically moves to the final cool tumble

Set and Forget Drying (Multi Level): As above but the dryness level of the load can be set as 'Iron Dry', 'Cupboard Dry' or 'Hanger Dry'

Set By How Dirty: By selecting light, normal or heavy soil programme the washer automatically adjusts the agitation level and washing time to suit the load

Soft Touch Material: A tactile, non-slip material on the dispenser drawer and contact areas

Spin Performance: Spin Performance is measured on a scale from 'A' to 'G' with 'A' rated machines removing the most water during the spin cycle

Store Favourite Programme: Tailors a programme to suit your individual requirements and store is as your favourite programme

Super Silent: The specialised induction motor and acoustic absorbing material dramatically reduces noise levels during the wash and spin cycles to as low as 47dB

Super Wash: An intensive wash delivering a superior wash performance compared to the standard 60°C 'A' wash

Time Delay: Allows you to delay the start of the wash or dry programme for up to 24 hours

Time Saver: Saves up to 1/3 of the wash time on selected programmes

Time to End: A countdown of time remaining in the programme

Top Water Bottle: The Condenser Dryer water bottle is at the top of the dryer for easy access

Variable Spin: The spin speed can be adjusted to suit different fabrics

Variable Temperature: The programme temperature can be lowered to suit different fabrics

Wash Performance: Wash Performance, or how clean the load gets, is measured on a scale from 'A' to 'G' with 'A' being the cleanest

Wool Programme (Dryers): A delicate drying programme suitable for woollens

Woolmark Gold Care - Hand Wash Wool Programme: This programme is endorsed by Woolmark. Extra gentle agitation and low-spin speeds ensure that wool items get the same personal touch as a hand wash

Washer Dryers available Summer 2004. [≠]ITCL = International Textile Care Labelling standard programmes include 95°C White Cotton & Linen, 60°C Cotton, 50°C Synthetics, 40°C Acrylics, Fast Spin, Slow Spin, Rinse and Spin. *The Energy Labelling regulations only allow a machine to be labelled up to an 'A' energy rating based on a standard 60°C Cotton Cycle. However new legislation due to be introduced during 2004 will allow an 'A+' energy rating to be used where applicable. These models comply with this new standard. All Hotpoint washing machines and washer dryers can be converted to cold fill only using a special adapter available as an optional extra.

[†]Please note that all graphite appliances do match. However, in certain lights and from different angles, the same colour of adjacent models may appear to differ slightly. [#]It is possible to reduce the height of a washing machine to 820mm by removing the worktop and replacing with a reduced height table top. The kit is available from Hotpoint Service but requires an engineer's visit to make the modification. On all front loading machines, we recommend a gap of at least 20mm either side of the machine when installed. Always consult handbook for installation details. All optional accessories are available from your retailer or by calling the National Spares number 08709 077 077 or visiting www.hotpointservice.co.uk

Condenser Dryers available Summer 2004. Always consult handbook for installation details. For all rear venting tumble dryers a wall (Part No. 9028) or window (Part No. 9029) ventilation kit for permanent installation is available as an optional extra. All Hotpoint Tumble Dryers can be stacked with Hotpoint front loading automatics using a stacking kit. This is available by calling the Hotpoint Spares National Call Number: 08709 077 077 or visiting www.hotpointservice.co.uk †Please note that all Graphite appliances do match. However, in certain lights and from different angles the same colour of adjacent models may appear to differ slightly.

Built-in Laundry Technical Information

Installation Details

Supply 230/240v AC only. Must be earthed. Completed with fitted plug and hot and cold hoses. Minimum installed depth 570mm with offset standpipe and electrics. Full fitting details supplied with appliance.

After Sales Care

Our commitment to making your life easier doesn't stop once you've bought your appliance. Hotpoint's After Sales Care is second to none. We maintain our position as Europe's largest provider of service care to the domestic appliance industry by taking pride in the quality and effectiveness of the service you receive. Here are six good reasons to choose the UK's most popular and trusted manufacturer:

Satisfaction Guaranteed Or Your Money Back
In the unlikely event that a technical problem occurs that cannot be resolved, we'll either replace your machine or give you your money back. This guarantee is valid for 90 days from the date of purchase.

Free Five Year Parts Guarantee
All parts are guaranteed for five years. We only ask that any replacement parts are fitted by our engineers. During the first year our engineer's time and labour are also free.

Call the Experts
We have over 1,000 fully trained engineers on call to make your life easier with speedy and effective repairs, service and advice. With this level of support there is always an engineer within easy reach to ensure you receive fast, local service. And you can book a service call with us at any time, 365 days a year.

Service At Your Convenience
We recognise that life is busy and try to fit in with your lifestyle. In most cases we can give you the choice of a first or last call, morning or afternoon, or even a Saturday morning appointment, whenever you find it most convenient.

Hotpoint Service Care
You can take out one of our extended warranties to cover any repair costs that may be necessary. If you have more than one Hotpoint appliance, we can provide Kitchen Cover to take care of all eventualities.

Special Needs
As part of our commitment to make life easier, we have a range of special accessories to assist the blind, visually impaired, arthritic or disabled in using the majority of our appliances.

Hotpoint Service
You can call us Monday to Friday 8am to 8pm, Saturday 8:30am to 5:30pm and Sunday 10am to 4pm on

08709 066 066
or visit
www.hotpointservice.co.uk

You'll find full details of our guarantees and After Sales Service in the instruction book included with all Hotpoint appliances.

In accordance with its policy of progressive product design and environmental protection, the company reserves the right to alter specifications and use quality recycled components. Every attempt has been made to ensure an accurate colour representation of the appliances and features illustrated but due to the limitations of the printing process, there may be some slight variations. Full terms and conditions of our After Sales Care are included in the instruction book enclosed with all our appliances. All offers of guarantees and servicing apply to the UK only. For overseas, please contact you local dealer. Hotpoint®, Iced Diamond®, Ultima®, Aquarius® and First Edition® are trademarks of Merloni Elettrodomestici UK Ltd.
